WHO WE ARE

Consulting & Product Engineering

Since 2016

We are a Consulting and Product Engineering company that designs, builds, and manages cutting-edge solutions for SMEs and enterprises — spanning Cloud, GenAI, MLOps, and digital product engineering.

100+ Yrs Combined Experience

NLP, Vision, GenAI — deep domain expertise

3 Products — Solving Problems Through AI

Boliye + SEPTA + Piivacy: From Customer Interactions to Boardroom Decisions to Compliance

99.9%

Cloud & DevOps

Resilient, Multi-Cloud, Highly Available Solutions

25M tx/day

Engineered for Scale

Designed to scale for BFSI, built for India

0+

10+ Products Engineered

Enterprise-grade platforms deployed across 8 countries

0+

Research Publications

Agentic AI, ML, RAG, Deep Learning

TRUSTED BY

OUR TEAM

World-Class AI Engineering Team

FOUNDING LEADERSHIP

Prateek R Sengupta
Co-Founder & CGO

Ex-Reliance Innovation Labs · 20 yrs

P Govind Raj
Co-Founder & CTO

PhD (P), MS IIT Delhi · Ex-CDAC · 20 yrs

Chinmay Garg
Co-Founder & CIO

B.Tech, MBA · Ex-CDAC · 20 yrs

Arnab Bhattacharya
AI-Native Head of Product

IIT Kharagpur · IIM Lucknow · 22 yrs

CORE TECHNICAL TEAM

Dr. Soman
Research Lead

PhD IIT Delhi · Ex-CDAC · 16 yrs

- PhD in ML (IIT Delhi)
- 50+ publications (850+ citations)
- Active contributor to GenAI & RAG
- Ex-Ericsson AI, CDAC

Shikhar Gupta
Engineering Manager

MS NCI Ireland · Ex-CDAC · 10 yrs

- 10+ yrs in backend & cloud-native
- Leads prod-grade AI platforms
- Expert in distributed systems DevOps
- Deep AI/LLM workflow integration

S Sengupta
Senior Researcher

MS IIT Delhi · Ex-CDAC · 16 yrs

- Biomedical signal detection
- ML for deep pattern recognition
- Feature extraction from raw tech
- Deploys research into enterprise AI

Shubham Jindal
AI / ML & MLOps Lead

MS UGA · Ex-CDAC · 15 yrs

- Leads ML for massive IoT & grids
- Expert in end-to-end MLOps infra
- MS in AI (UGA) with NLP focus
- Ex-CDAC & DRDO (Applied ML/NLP)

THE OPPORTUNITY

\$104B+ Market — Why Now?

\$104B+
TAM BY 2030

●	Conversational AI \$11.6B → by 2030	\$41.4B 23.7% CAGR
●	LLM Market \$6.5B → by 2030	\$36.1B 33.2% CAGR
●	SLM Market \$5.3B → by 2032	\$26.7B 22.4% CAGR

72%
Enterprise AI Adoption
Experimentation → production

10x
SLM Cost Savings
On-device, privacy-first models

22
Indian Languages
AI demand outpacing supply

\$48B
Agentic AI Wave
43.3% CAGR by 2030

VISION & PRODUCTS

Defining the Future of Autonomous Business

OUR BELIEF In 3 years, the most competitive enterprises will integrate **Conversational AI, Predictive Analytics & Privacy-first Governance** into a single, seamless flow.

Boliye

Conversational AI Voice & Chat

Automates customer conversations across telephony, WhatsApp, and web — driving measurable business outcomes at a lower cost per interaction.

Sub-2s
Latency · 22+ languages

[boliye.ai](#)

LIVE

SEPTA

Multi-Modal Enterprise AI Platform

Deploys intelligent agents across Sales, Operations, Marketing, Finance and CxO functions — enabling automation, streamlined operations, and actionable insights.

10x
Faster insights · No-code

[septa.live](#)

LIVE

Piivacy

AI-Powered Compliance & Protection

Continuous compliance and protection platform, enabling trust for enterprises.

99.2%
Detection · BFSI ready

[piivacy.ai](#)

BETA

EXPANDING THE FRONTIER: FUTURE STRATEGIC FOCUS

System Security & AI Ethics

Hardening AI against adversarial attacks; “Human-in-the-Loop” ethical oversight

AI Governance Frameworks

Audit trails and transparency for DPDP, GDPR compliance

Secure Document Intelligence

Beyond PII detection to cryptographically-secured document processing

Digital Signature Framework

AI-verified document workflows with digital signatures

TRUSTED BY LEADING ENTERPRISES

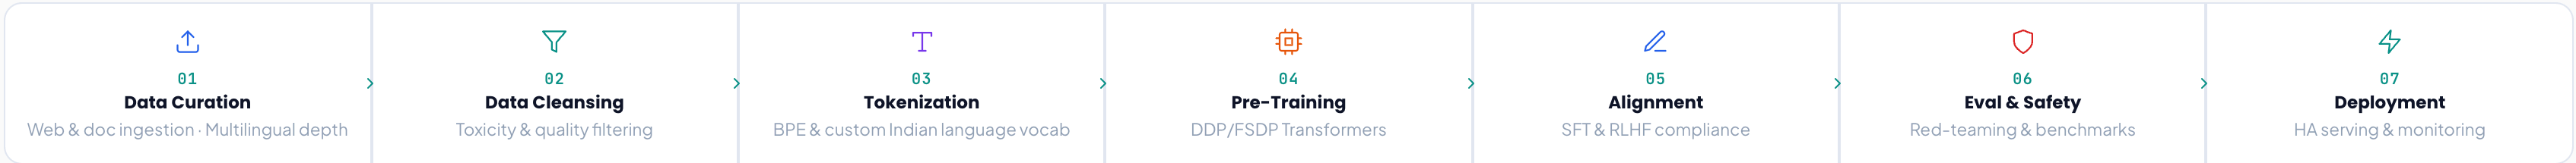

THE LIBERIN ENGINE

From Raw Data to Enterprise Intelligence

THE ADVANTAGE

Unlike generic AI providers relying on third-party APIs, **we own the entire stack**. Controlling the pipeline from raw ingestion to deployment delivers **superior performance, lower latency & cost-efficiency**.

THE EFFICIENCY MOAT

KEY LEVER

Zero Deps
Own the Lifecycle
No hidden API costs, no vendor lock-in. Full data sovereignty for clients.

KEY LEVER

35–40%
GPU Utilization
H100/A100 ROI far exceeding industry averages. Hardware-optimized pipelines.

22+ Langs
Multilingual Supremacy
Native pipelines optimized for the nuances of Indian languages.

Production-First
Built to Scale
Models built for enterprise load, not just benchmarks. Deploy-ready from day one.

Accelerating from \$1M to \$10M ARR

“We are scaling our team to mirror our revenue goals—not just our product roadmap.”

1. TALENT STRATEGY – THE “EXECUTION-FIRST” RAMP UP

Engineering & Research 40%

Doubling down on core **AI infra, model security & optimization** to maintain our 40% GPU utilization edge.

Revenue & Growth 40%

Enterprise Sales, Pre-sales Solution Architects & Customer Success managers to drive LTV.

Compliance & Governance 20%

AI Ethics & Regulatory Affairs specialists to clear security hurdles for BFSI/Healthcare procurement.

2. GO-TO-MARKET STRATEGY – DEMAND GENERATION & AUTHORITY

Authority Marketing

Establishing Liberin as the “Thought Leader” in Trustworthy AI. PiiVacy & Governance frameworks anchor CIO/CISO conversations.

Land & Expand Funnel

Land: Boliye (CX) & Septa (BI) for quick-win pilots. **Expand:** PiiVacy & Secure Signatures to deepen integration—making Liberin “un-rippable.”

Strategic Partnerships

Co-selling with **AWS/Azure/GCP** & Tier-1 System Integrators to tap into existing multi-million dollar enterprise budgets.

THE SCALING ROADMAP: 2026-2028

Scaling Pillar	PHASE 1 Foundation (\$1M)	PHASE 2 Growth (\$3M-\$5M)	PHASE 3 Scale (\$10M)
Team Size	15 (R&D Focused)	40 (Balanced)	80+ (GTM & Delivery)
Marketing	Product Validation	Content/Authority Lead Gen	Partner-led / ABM
Sales	Founder-led Sales	Field Sales & Pre-sales	Global Channel Partners

MARKET CONTEXT

Massive Call Center Market Ready for AI

INDIA CALL CENTER SCALE

\$50B

Indian BPO / call center industry (2024)

2–2.5M

Active Agents

150–250M

Calls / Day

55–90B

Calls Annually Across Industries

MARKET GROWTH

\$139B

projected by 2033

~12–13% CAGR driven by digital CX demand

HIGH-VOLUME REPETITIVE WORKFLOWS

- ▶ Customer verification & onboarding
- ▶ Payment reminders & collections
- ▶ Surveys & feedback programs
- ▶ Appointment confirmations & reminders
- ▶ Lead qualification & outbound outreach

AUTOMATION OPPORTUNITY

30–40% of calls are repetitive & automatable

~25B automatable calls annually in India

As call volumes grow, AI automation scales alongside the market

AI Voice Agents Transform Call Center Economics

TRADITIONAL CALL CENTERS

Cost per Agent / Month	₹50K-70K
Cost per Call	₹35-80
Operations	8-9 hrs / day
Scaling	Hire + Train + Infra

AI VOICE AGENTS

₹5	per automated call	80-90% cost reduction
24x7	Operations	Instant Scalability

ENTERPRISE-GRADE CAPABILITIES

- ✓ Multi-language voice (Indian + global)
- ✓ Plug-and-play with existing CRM / dialers
- ✓ Scale up or down instantly per campaign
- ✓ Handle millions of calls without workforce

MARKET OPPORTUNITY

25B automatable calls / year in India

₹5 / call → ₹12,500 Cr
AI Voice Automation Market

With BPO growth & CX automation adoption, AI voice becomes a multi-billion dollar global market

Let's Build the Future Together

We have the team. We have the expertise. We have the products.

Now we need the infrastructure to scale.

Let's Build Together →
