

Diversified Enterprise Group

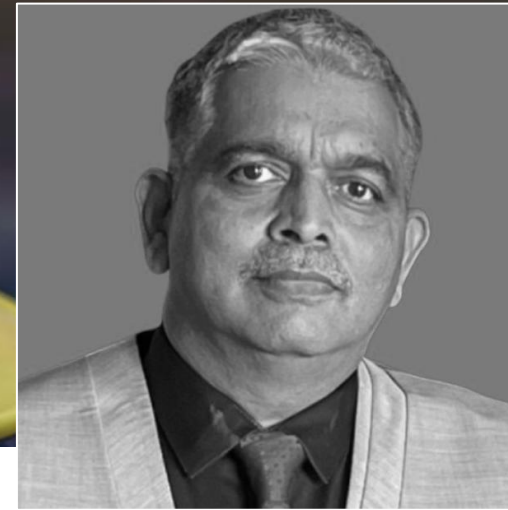

Building businesses with awareness, integrity, and responsibility,
where every decision considers long-term impact on people,
planet, and progress.

Leadership team

Mr. Prem Kumar Pandey
MD Manah Holding Pvt Ltd

An Information Technology graduate with extensive global experience, he provides strategic leadership for Manah Holdings, representing the group across international networks and forums. He has successfully led major global projects, from large-scale power transmission initiatives to building the Electric Buses Strategic Business Unit and driving it to profitability, while mentoring business directors to deliver operational excellence across verticals.

Cdr. Pravin Sharad Dixit (Retd.)
Director Manah Dynamics Pvt Ltd

A retired Navy Commander and IIT Kanpur alumnus, is a Certified Independent Director, ESG & BRSR Expert, and Digital Director with over 41 years of leadership experience across military and corporate sectors. A strategic thinker and seasoned leader, he is dedicated to delivering innovative, future-ready solutions that create lasting value. Under his guidance, Manah Dynamics continues to drive progress with a focus on reliability, sustainability, and impact.

DYNAMICS

Innovations & Implementations

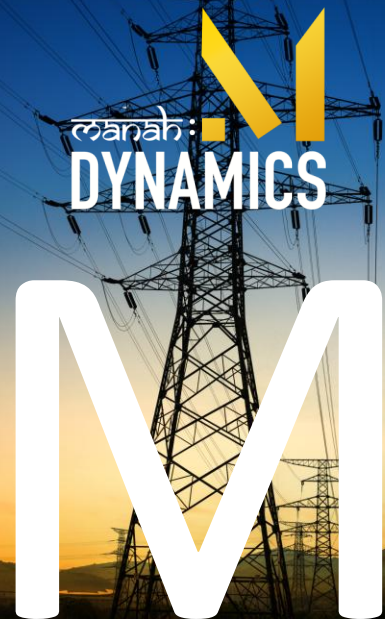

As the strategic arm of Manah Holdings, **Manah Dynamics Pvt. Ltd.** delivers end-to-end infrastructure and technology solutions powered by skilled talent and seasoned leadership, with a dual focus on **Projects & Infrastructure** and **Technology & Manufacturing**. The company also actively forges strategic collaborations to strengthen its technical capabilities, financial capacity, and market presence across diverse infrastructure and energy sectors.

**PROJECTS &
INFRASTRUCTURE**

**TECHNOLOGY &
MANUFACTURING**

Projects & Infrastructure

Executes high-value projects with proven expertise, reliability, and speed. Operating across diverse delivery models such as DBFOOT, DBOOT, BOO, BOOT, and Investment Projects, the division combines engineering precision with financial and operational efficiency. Its ready-to-deploy skilled workforce ensures timely, high-quality delivery across power transmission, renewable energy, and critical infrastructure sectors.

PROJECTS & INFRASTRUCTURE

Business Pipeline & Growth Outlook

Showcasing ongoing projects and upcoming opportunities that underline Manah Dynamics' growth trajectory and market potential.

224Cr worth of projects under execution

ONGOING PROJECTS:

1. Construction of four G+4 residential buildings at Narangi Military Station under GE Guwahati (MES):
Project Value: ₹53 Crores
2. Supply and installation of 48,893 DTC meters across six districts in Hubballi and Belagavi, including five years of maintenance for HESCOM:
Project Value: ₹171 Crores

PIPELINE PROJECTS:

1. Due diligence of product and EPC companies underway for three potential mergers and acquisitions
2. EPC works worth **₹10,500 Crores** currently being pursued through bids in domestic and international markets
3. Investments worth **₹8,500 Crores** under planning and execution across key sectors
4. HAM projects worth **₹11,500 Crores** under bidding at the domestic level

Deliveries under the leadership

With a combined experience of over six decades, our leadership has a proven track record of delivering complex, milestone projects, from Nuclear and Defence to Water & Irrigation, Power T&D, Hydropower, Solar and Electronic device manufacturing

1. EHV Transmission Lines, Substations, and Underground Cables – up to 765 kV
2. Pumped Storage Hydropower (PSHP), Hydropower Projects, 100 MLD Water Treatment Plants, and Irrigation Projects
3. Solar Projects – Rooftop and Ground-Mounted Installations
4. Defence Systems, Communication Networks, and Composite Technologies

Our Project Footprints

Technology & Manufacturing

A comprehensive Electronics Manufacturing Services (EMS) provider with strong R&D, design, assembly, and packaging capabilities, Manah Dynamics supports global OEMs and emerging technology markets with end-to-end, design-to-delivery solutions under one roof. Through research-driven innovation and scalable production, it develops advanced electronic systems for household, commercial, and industrial applications, strengthening India's position as a hub for high-quality, future-ready manufacturing.

Design & Engineering:

End-to-end product development, prototyping, and innovation support.

Manufacturing:

Advanced PCB assembly, box build, and full system integration.

Testing & Quality Assurance:

Rigorous compliance testing and reliability validation.

Supply Chain Management:

Strategic sourcing, procurement, and logistics optimization.

After-Sales Services:

Comprehensive repair, maintenance, and warranty management.

Mr. Mohendra Kumar Pati

Director Manah Dynamics Pvt Ltd

TECHNOLOGY & MANUFACTURING

Our products & facilities

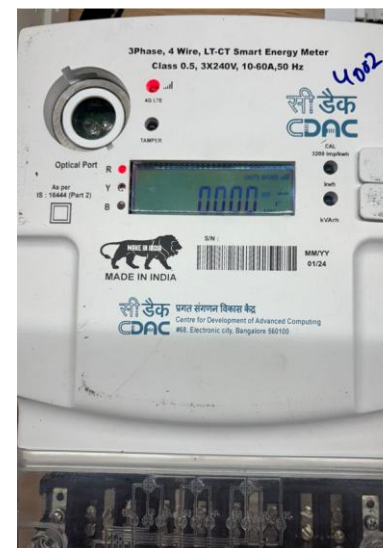

Highlighting our engineered products and the robust infrastructure that enables OEMs to launch their production effortlessly, without the need for extensive groundwork.

EMS

OUR INFRASTRUCTURE

Our state-of-the-art EMS plant, spread across 30,000 sq. ft. in Cherlapally, Hyderabad, is equipped to handle end-to-end electronics manufacturing, from prototyping and PCB assembly to testing and final product integration. The facility supports both in-house production and OEM partnerships.

OUR PRODUCTS

- Smart Energy Meters
- Smart Water Meter
- EV Chargers
- Room Chargers
- Defense RF Systems

मानाहः
GREEN ENERGY

Powering a Cleaner Future Through Green Hydrogen

Manah Green Hydrogen Pvt. Ltd., a wholly owned subsidiary of **Manah Dynamics Pvt. Ltd.** under the **Manah Group**, is driving innovation in green hydrogen production through advanced renewable technologies. Focused on building sustainable, large-scale hydrogen infrastructure, the company supports India's clean energy transition and Net Zero 2070 vision by promoting energy independence, technological excellence, and environmental responsibility.

PROGRESS TILL NOW:

MoU and Agreement:

Signed an MoU and Agreement with the Government of Madhya Pradesh for setting up a Hydrogen Production Plant at Bina, based on ARB (Artificial Photosynthesis) Technology.

Technology Partnership:

A strategic technological partnership has been established with SoHHytec SA, Switzerland, for the development and deployment of water-splitting Artificial Photosynthesis technology for green hydrogen production.

Investment and Project Scale:

Plans to invest ₹5,000 crores to produce 18,000 MTPA of green hydrogen in four phases over 350 acres of land near the BPCL Bina Refinery.

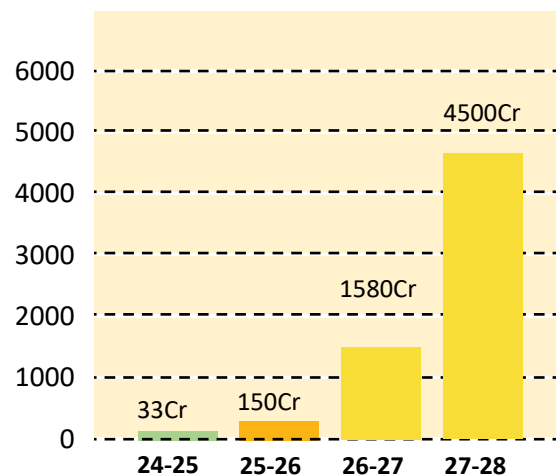

Project Progress:

Offtake agreements and land allotment activities are currently in progress, marking key milestones toward the project's execution.

Business overview & forecast

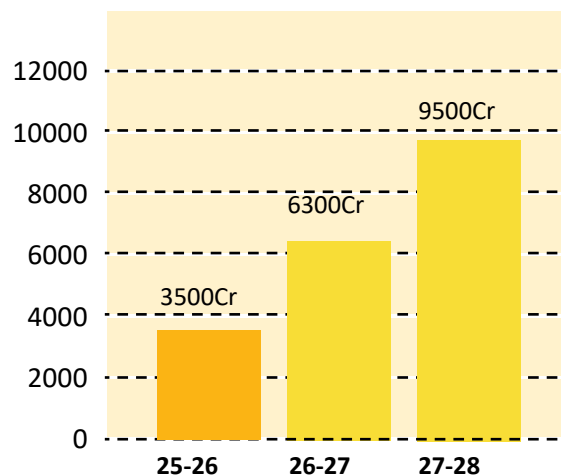

Strong execution and rising demand have fuelled our growth. With a solid pipeline and clear market momentum, we're positioned for continued tripple-digit expansion.
